

Final Projects

Web Development
Lesson 21.1

We are almost there...

Look at all you have learned!

The Browser <ul style="list-style-type: none">• HTML• CSS• JavaScript• jQuery• Bootstrap	Dev Tools <ul style="list-style-type: none">• Heroku• Git• GitHub	Server Side <ul style="list-style-type: none">• Templating Engines• Sessions• Writing tests• Node.js• Express.js• Creating APIs• MVC• User Authentication• ORM (Sequelize)
API Interaction <ul style="list-style-type: none">• APIs• JSON• AJAX• Real Time Cloud Database via Firebase	Databases <ul style="list-style-type: none">• MySQL• MongoDB	
Cutting Edge Development <ul style="list-style-type: none">• React.js		CS Fundamentals <ul style="list-style-type: none">• Algorithms• Data Structures

Your Goals Re-examined

And why do you want a new career?

To pursue a **dream**

To escape a **dead-end job**

To be able to **create**

To follow a **fascination**

To attain **financial stability**

To obtain **financial freedom**

To **challenge yourself**

To be a **role model** to kids

What's Left

01

Final Projects

02

Remaining Topics: Computer Science Algorithms, Javascript Design Patterns

03

Lightning Talks

04

Job Workshops

05

Demo Day!

Never Stop Learning!

01

The key to hireability and relevance is to constantly be learning.

02

The field is always changing and there is never a point where you can call it quits.

03

Stick with it! It's a craft that you continue to hone with time.

Final Projects

Your Challenge

Your Challenge

You have plenty of time to work on this.

You have ALL the skills you need.

You have a team of skilled developers.

You have experts willing to help.

No excuses. Time to prove yourself.

Expectations

Expectations

1. Whatever you build has utility.
2. Have market or real-world research that evidences your idea has REAL value to people.
3. Do some research on other web/mobile applications in your domain.
4. Put serious time and thought into this.
5. Report problems you are facing along the way.
6. Utilize some form of project management system.
7. Dig deep into documentation and external resources to learn what you need.

Requirements

Coding Requirements

- Must use **ReactJS** in some way (even if minimal)
- Must use a **Node and Express Web Server**
- Must be backed by a **MySQL or MongoDB Database with a Sequelize or Mongoose ORM**
- Must have **both GET and POST routes** for retrieving and adding new data
- Must be **deployed using Heroku (with Data)**
- Must utilize at least **two libraries, packages, or technologies** that we haven't discussed
- Must allow for or **involve the authentication of users** in some way
- Must have a **polished frontend/UI**
- Must have **folder structure that meets MVC Paradigm**
- Must meet **good quality coding standards** (indentation, scoping, naming)
- Must not expose **sensitive API key** information on the server

Deliverables

Deliverables

Instead of homework, you will be required to submit four Project Deliverables.

01

Plan, Design, and Research

02

Ready MVP (Working App!), Mini-Presentation

03

Project Polish, Functionality Push, Final Plan

04

Presentation Time!

Deliverables 1:

Plan, Design, and Research

Deliverables 1: Plan, Design, and Research

In this plan, you will include:

01

An overview of the intended application and WHY you feel it's valuable.

02

A set of DETAILED screen-by-screen design layouts with annotations describing all UI/UX components and all data relevant to the screen.

03

A breakdown of roles by group member.

04

A schedule for completion of various tasks.

05

A screenshot of your Project Management Board that shows breakdown of tasks, assigned to group members with a schedule.

Example UI/UX Flow

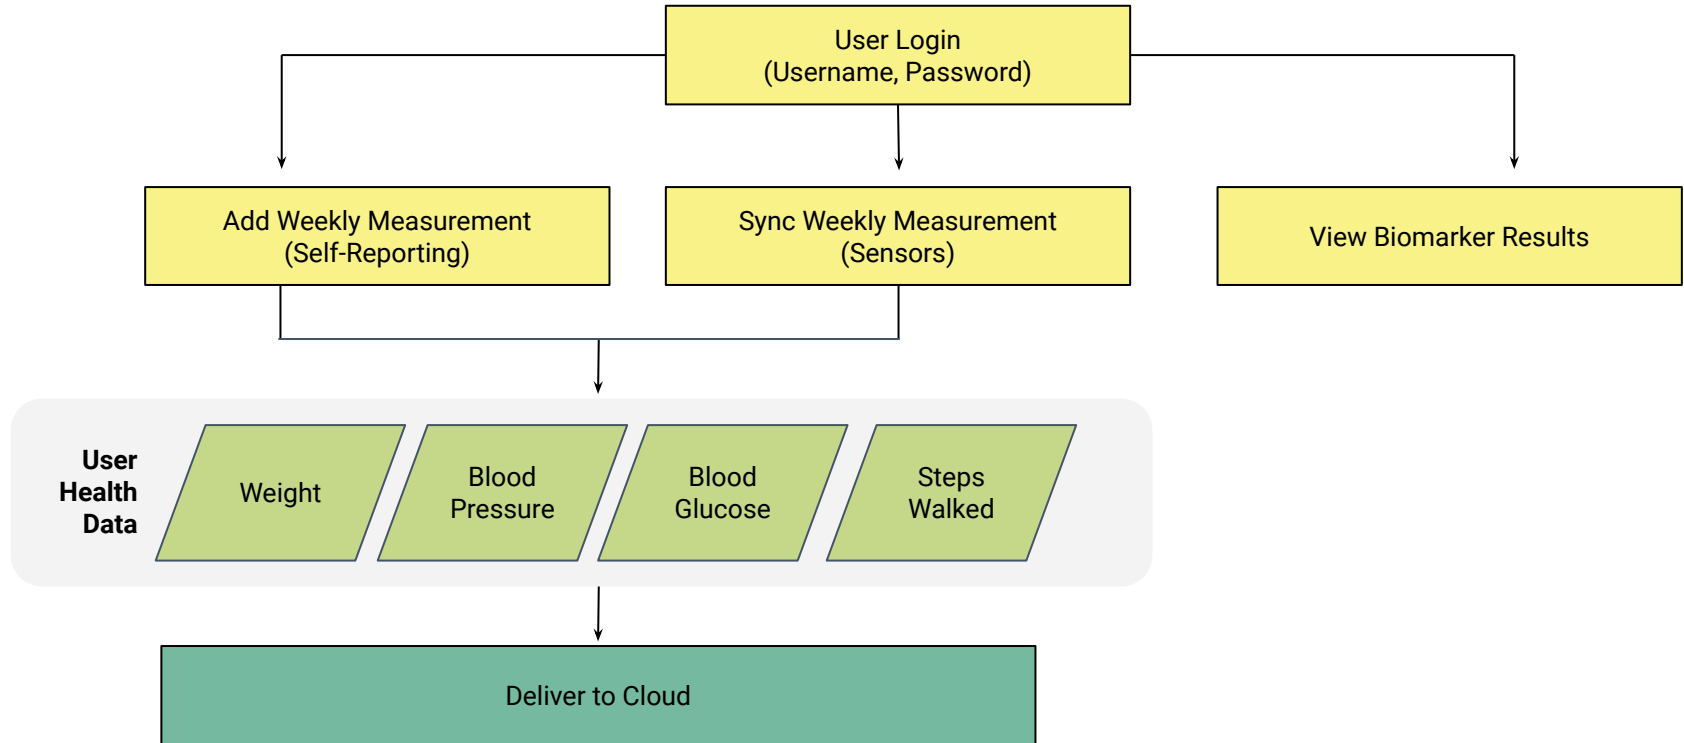

Screen Map

This is intended to show you the order in which users would see screens. The three branches correlate with the three button options from the main menu.

Example Data Flow

User View—Clinical Trial App
